Subject Index of Volume 31

Activated carbon
adsorption of organic matter from wet phosphoric acid using: equilibrium study, 191
inert gas desorption of single organic vapours from, 63
Adsorption
of organic matter from wet phosphoric acid using activated carbon: equilibrium study, 191
2-Amino-2-methyl-1-propanol
representation of equilibrium solubility properties of CO_2 with aqueous solutions of, 7

Barium sulphate precipitation
as model reaction for segregation studies at pilot scale, 307
Batch reactors
control of, using neural networks, 173
Bed voidage
in annular solid–liquid fluidized beds, 221
Benzene
process simulation of anodic oxidation of, to *p*-benzoquinone in two-phase electrolyte, 21
Bioproduct drying
optimal control of, with respect to product quality, 125
Bubble column(s)
reactors, modelling and simulation of, 97
slurry, Gaussian-convection model for solid dispersion in, 321
slurry reactors, methanol synthesis in, 213

Catalysts
porous, internal diffusion of gases in, in presence of liquid phase, 255
Closed-cycle technologies
in chemical industry, 43
Condensation
multicomponent, comparison of various mass transport models in, 161
Crystallization
batch salting-out, 39
research into kinetics of mass crystallization process and design of MSMPR-type crystallizers, 57
Crystallizers
MSMPR-type, research into kinetics of mass crystallization process and design of, 57

Deflector wheel classifiers
flow field in, 131
Desorption
given, isotherm, approximate isothermal drying curves of hygroscopic porous materials with, 149
inert gas, of single organic vapours from activated carbon, 63
Diffusion
internal, of gases in porous catalysts in presence of liquid phase, 255
and polarization phenomena, theoretical and experimental analysis of, in sugar solutions in spiral-wound modules, 13
Dimethyl succinate
modelling of kinetics of hydrogenolysis of, over Raney copper, 241
Dispersion
and mass transfer and macroscopical flow maldistribution in packed tubes, 181
solid, Gaussian-convection model for, in slurry bubble columns, 321
Distillation column control
hierarchical scheme for: on-line optimization, 337
Distillation tray efficiency
effect of entrainment on, with complete vapour mixing and partial liquid mixing, 31
Dynamic behaviour
of perforated-plate multistage fluidized-bed heat exchanger, 349
and steady-state behaviour of packed columns, experimental and theoretical studies of, 377

Electrochemical reactor
experimental and theoretical studies of new type of, for waste-water treatment, 195
Ethyl iodide
and methanol and toluene, measurements of vapour–liquid equilibrium, h^E and v^E for binary and tertiary mixtures of, 77

Flashing high-viscosity fluids
top-venting of, 297
Flow field
in deflector wheel classifiers, 131
Flow rates
unequal, impingement-sheet mixing of liquids at, 229
Fluidized bed(s)
annular solid–liquid, bed voidage in, 221
liquid, heat transfer to, in annuli, 363
perforated-plate multistage, heat exchanger, dynamic behaviour of, 349
Free convection film boiling
analytical model for, on immersed solids, 137

Gas/liquid flow
measuring device for, 87

Heat exchanger(s)
perforated-plate multistage fluidized-bed, dynamic behaviour of, 349
plate heat exchangers — method of calculation, charts and guidelines for selecting plate heat exchanger configurations, 49
Heat transfer
convective, losses from flat surfaces, reduction of, 331
and hydrodynamics in packed beds with liquid upflow, 385
and laminar flow to pseudoplastic fluids in pipes, 247
to liquid fluidized beds in annuli, 363
Heat transport
radial, in packed beds at elevated pressures, 157

Hydrodynamics
and heat transfer in packed beds with liquid upflow, 385
hydrodynamic and mass transfer characteristics of sectionalized aerated slurry reactors, 263
Hydrogenolysis
modelling of kinetics of, of dimethyl succinate over Raney copper, 241
Hygroscopic porous materials
approximate isothermal drying curves of, with given desorption isotherm, 149

Ice
melting of, in pure and saline water inside square cavity, 311
Impingement-sheet mixing
of liquids at unequal flow rats, 229
Ion exchange resin
exclusion equilibrium between sucrose–NaCl solution and, 207
Isobutene
kinetic study of oligomerization of, over H-mordenite, 1
Isothermal drying curves
approximate, of hygroscopic porous materials with given desorption isotherm, 149

Laminar flow
and heat transfer to pseudoplastic fluids in pipes, 247
Linearization
of equilibrium relationships in multicomponent mass transfer models:
comments on, 273
reply to, 274

Macroscopical flow maldistribution
and mass transfer and dispersion in packed tubes, 181
Mass transfer
and dispersion and macroscopical flow maldistribution in packed tubes, 181
and hydrodynamic characteristics of sectionalized aerated slurry reactors, 263
multicomponent, models, linearization of equilibrium relationships in:
comments on, 273
reply to, 274
Mass transport models
various, comparison of, in multicomponent condensation, 161
Mellapak structured packings
hold-up of, 119
Melting
of ice in pure and saline water inside square cavity, 311
Methanol
and ethyl iodide and toluene, measurements of vapour–liquid equilibrium, h^E and v^E for binary and tertiary mixtures of, 77
synthesis in bubble column slurry reactors, 213
Mixers
rotor-stator, fast reactions in, of different size, 285
Mixing
effect of entrainment on distillation tray efficiency with complete vapour mixing and partial liquid mixing, 31
impingement-sheet, of liquids at unequal flow rates, 229
Mixtures
measurements of vapour–liquid equilibrium, h^E and v^E for binary and tertiary mixtures of methanol, ethyl iodide and toluene, 77
Mordenite
H-, kinetic study of oligomerization of isobutene over, 1

Neural network
control of batch reactors using, 173

Oligomerization
kinetic study of, of isobutene over H-mordenite, 1
Optimal control
of bioproduct drying with respect to product quality, 125
Optimization
on-line, hierarchical scheme for distillation column control, 337
Oxidation
anodic, process simulation of, of benzene to *p*-benzoquinone in two-phase electrolyte, 21

Packed beds
hydrodynamics and heat transfer in, with liquid upflow, 385
radial heat transport in, at elevated pressures, 157
Packed columns
experimental and theoretical studies of steady-state and dynamic behaviour of, 377
Packed tubes
mass transfer, dispersion and macroscopical flow maldistribution in, 181
Phosphoric acid
wet, adsorption of organic matter from, using activated carbon: equilibrium study, 191
Polarization phenomena
and diffusion, theoretical and experimental analysis of, in sugar solutions in spiral-wound modules, 13
Product quality
optimal control of bioproduct drying with respect to, 125
Pseudoplastic fluids
laminar flow and heat transfer to, in pipes, 247

Raney copper
modelling of kinetics of hydrogenolysis of dimethyl succinate over, 241

Segregation studies
barium sulphate precipitation as model reaction for, at pilot scale, 307
Simulation
and modelling of bubble column reactors, 97
process, of anodic oxidation of benzene to *p*-benzoquinone in two-phase electrolyte, 21
Slurry reactors
bubble column, methanol synthesis in, 213
sectionalized aerated, hydrodynamic and mass transfer characteristics of, 263
Solid wastes
divided, thermal treatment of, by gas-contact process, 277
Solubility properties
equilibrium, representation of, of CO_2 with aqueous solutions of 2-amino-2-methyl-1-propanol, 7
Sucrose–NaCl solution
exclusion equilibrium between, and ion exchange resin, 207
Sugar solutions
sucrose–NaCl solution, exclusion equilibrium between, and ion exchange resin, 207
theoretical and experimental analysis of diffusion and polarization phenomena in, in spiral-wound modules, 13

Thermal treatment
of divided solid wastes by gas-contact process, 277
Toluene
and ethyl iodide and methanol, measurements of vapour–liquid equilibrium, h^E and v^E for binary and tertiary mixtures of, 77
Top-venting
of flashing high-viscosity fluids, 297
Vapour–liquid equilibrium
measurements of, and h^E and v^E for binary and tertiary mixtures of methanol, ethyl iodide and toluene, 77
Waste-water treatment
experimental and theoretical studies on new type of electrochemical reactor for, 195
